

# Alison's Willow Workshop – Sunday 3<sup>rd</sup> October

10am – 5pm. £60. Max 6. Lunch, refreshments & materials included

Join us on another of Alison's Basket-making workshops. In just one day you will learn to make a lovely rib or frame basket with a handle using Alison's beautiful willow. The

technique was traditionally used by agricultural workers or travellers who made the small round baskets from hedgerow materials, but they are also ideal for a variety of uses today such as storing eggs or fruit. Alison is *'a great admirer of willow in all its many varieties'* and she grows some

of her own or sources it locally. The willow she brings to this workshop includes a variety of different species each of a different shade, from light brown to russet to dark chocolate, and they can all be incorporated into the basket. Once the frame is made, weaving the coloured rods is fun, easy to do and very rewarding. The end result – a beautiful basket with a variety of uses which will last for many years!
