## 'Sow and Grow your Own Bouquets'

Be inspired to sow and grow your own bouquets. 10:00 am to 5:00pm. £45, includes materials and lunch. Max 8. Please wear outdoor clothes and shoes for afternoon practical session.

### Course Description

This 1-day workshop will be taught by Rachel Petheram who runs the Cutting Garden at Doddington Hall, near Lincoln, and whose flowers are sold in the wonderful Farm shop there. Rachel is "passionate about natural seasonal flowers and about producing flowers in a sustainable way" – she grows all her flowers without using harmful pesticides or chemicals and you can do the same in your garden too. By growing your own flowers, you are also able to reduce air miles, help the environment and have fun growing them too!

In one day you will learn how to plan and plant your own cutting garden. Now is the time to get started so you can reap the floral harvest throughout the summer and autumn. And with a little planning you can produce beautiful bouquets for your home throughout the year for very little cost.

In the morning Rachel will help you with site plans, suggest which plants you can grow in your garden and provide you with invaluable tips and other gardening advice. A lovely home-made lunch will then be served which will include the opportunity to sample our delicious Apple Wine! Rachel continues her hands-on advice after lunch using the raised beds in the Manor House Gardens to show you how to start your own Cutting Garden.

No Previous Experience Needed
