

# Home-made Christmas: Silk Screen printed Christmas Cards

Wednesday 10<sup>th</sup> November

10am – 5pm. £65. Max 6. Lunch, refreshments & materials included

The first of our 'Home-made Christmas' workshops, we start by making Christmas cards. Jonathan Korejko is back again, this time teaching us how to make cards using screen and relief printing techniques. We will learn how to use the screen printing equipment, how to prepare hand-cut paper stencils and finally how to print on the paper and card employing techniques of colour printing. Once the cards have been made, greetings can be printed inside the cards using a portable relief printing press. The end result is a limited edition set of greeting cards for you to give to your friends and family! Once you have mastered the screen printing technique, you can screen print other festive items on paper or cloth, for example, serviettes, Christmas tree ornaments and gift tags. All the equipment and materials required for this course are supplied.
